## LAKEHEAD LOCAL GOVERNMENT REVIEW

# INFORMATION ON THE LAKEHEAD

A RESEARCH REPORT  
APRIL 30, 1966

LAKEHEAD LOCAL GOVERNMENT REVIEW

Eric Hardy, Commissioner

Donald M. Paterson, Research Director

INFORMATION ON THE LAKEHEAD

A RESEARCH REPORT

April 30, 1966

1131103

## ACKNOWLEDGEMENTS

In collecting the facts used in the preparation of this research report, the work of the Review staff has been supported by the substantial co-operation of provincial, municipal and school officials both at the Lakehead and in Toronto. Extensive information was supplied by the research staff of the Department of Municipal Affairs. The Area Superintendent of the Department of Education and school officials in the twin cities gathered basic school data. The Lakehead Planning Board and the Regional Office of the Department of Municipal Affairs each provided information and helped collect material from others. Local municipal officials extended themselves to supply other requested facts on short notice. To all these people we express our warmest thanks.

## INTRODUCTION

This report constitutes the second step in the Review process. The purpose of the report is twofold: to inform the Commissioner about the Lake-head, and to provide a standard factual basis which will be of assistance to those preparing submissions. The information will also provide standard data with which the submissions themselves may be compared. To serve its several purposes, the information must be accurate and we rely upon those who receive the report to draw any errors to our attention.

In preparing the report the Review staff has been torn by two conflicting desires: the wish to produce as comprehensive a publication as possible, and the need to meet a very tight time schedule. The result has been a compromise which has broadened the report's coverage by extending the publication deadline as far as possible. It is sincerely hoped that as a result the report will better serve its purpose, and that the announced extension of the closing date for submissions (formerly set at May 15th) to "four weeks from the date the Research Report is released" will still permit those preparing briefs to make full use of it. The final date for receipt of submissions will thus be June 6th.

### Nature and Coverage of the Report

The information collected is given almost entirely in tabular form, with relatively little accompanying text. This is in part a reflection of the nature of the material: objective, factual statistics which are best presented in tabular form. It was also deemed wise to allocate most of the limited time available to the collection and analysis of data rather than the preparation of text. And finally, interpretation of the incomplete information available at this time is considered inappropriate.

### The Study Area

In conducting the research, a study area was selected comprising the five sponsoring municipalities of Fort William, Port Arthur, Neebing, Paipoonge and Shuniah, along with the five neighbouring organized municipalities in the

District of Thunder Bay, i. e. the Townships of Gillies, O'Connor, Conmee and Oliver and the Improvement District of Dorion. This wider area was chosen in the light of the terms of reference, which direct the Commissioner to consider the whole populated area surrounding the Lakehead cities.

Wherever possible, material has been collected for the whole Study Area. In presenting the information certain municipal groupings are used, along with the individual figures for each municipality. Thus the Cities of Fort William and Port Arthur taken together are referred to as the "Urban" portion of the Study Area, while the Municipalities of Neebing and Shuniah along with the Township of Paipoonge are identified as the "Suburban and Rural" portion. These two groupings are then combined as the "Designated Municipalities", following the wording used in the terms of reference. Finally the remaining five municipalities are grouped as the "Outer Municipalities", so that the "Designated" and "Outer" groups combined total the "Study Area".

In the case of a few tables, the sources used covered only part of the Study Area. On the other hand, in the field of education, coverage has generally been extended into "Adjacent Unorganized Territory" where school boards have been established.

### Period Covered

The research programme will ultimately include most items of information for the years 1954, 1959, 1964 and 1965 so as to establish relevant trends. Some more recent data will also be obtained. However the information available in time for publication is for the most part limited to the 1959-1964 period, although in some cases earlier or later years are included.

### Organization of the Report

The material is organized into three main parts. Part I presents general information on the Lakehead, particularly on the economy and population. Part II deals with the structure and functions of local government in the Study Area. It is divided into several sections, each dealing with a different function or group of functions. Part III then brings the separated functions

together again to produce a comprehensive view of municipal finance, looking at the equalized assessment, current expenditures and debt of all the municipalities comprising the Study Area.

It will be noted that the first page of each section contains a list of all the tables contained in that section.

### Further Research

It will be obvious that several areas of information have not been covered, while others have not received the attention they deserve. It is intended to fill these gaps through the remaining research programme so that the Commissioner may be fully informed when developing his recommendations. Reference is made to some particular omissions in later sections of this report. Probably the most obvious omission is the lack of information on local government organization in the Study Area. Much of this information has already been compiled. The picture was not yet complete enough to permit its analysis and inclusion in this report however.

## PART I

### General Information on the Lakehead

This part of the report contains economic and demographic material which provides part of the background information necessary to an understanding of the Lakehead.

In Section 1, The Economy, four tables of labour force and income data compare the Lakehead with Thunder Bay, with Ontario and with other major urban centres in the Province, to show some of its characteristics as a place of employment and production.

Section 2, Population, comprises eleven population tables. The first two, Tables 5 and 6, deal with past and projected population growth in the Lakehead compared with Thunder Bay and Ontario. Tables 7 and 8 show the components of recent growth in terms of urban and rural population and of natural increase and net migration.

The changing distribution of population among the municipalities of the Study Area over the period 1951-1965 is given in Table 9.

The next two tables deal with population characteristics and with changes in the age distribution, which may be reflected by changing demands for various municipal services.

The remaining tables in this Section, 12 to 15 inclusive, deal specifically with the school age population which is of particular concern to local government. Table 15 deserves a word of explanation. It provides a crude five-year projection of the school load in the Study Area, and is based on the fact that the 1970 school age population has already been born. It ignores the effect of deaths over this period, but as the death rates in these younger age groups are relatively low, the statistical distortion is not too serious. It also excludes the effects of net migration however. This would cause the actual 1970 school load to vary significantly from the projections. Net migration into the Study Area between now and 1970 could add many additional pupils for

example, while population movements within the Study Area may be expected to shift the projections for individual municipalities in varying degree.

Among the pertinent background information omitted from Part I, the lack of material on the history of the area and on its physical setting are significant. It would be useful to have a distribution of employment by location within the Study Area, and to show recent trends in the seasonal fluctuation of employment. Perhaps most significant however, is the absence of consideration of the future economic prospects of the region, a subject which deserves a thorough study in itself and to which our Review has already given some attention and plans to give more.

| - as % of Study Area      | 88.5      | 94.5      | 94.7      | 95.8      | 96.4      | 97.4      | 97.5      |                         |

Source: Census of Canada.

\* Dorion Improvement District, created Jan. 1, 1951 is omitted from the Study Area (but included in Thunder Bay) for comparability with earlier years. The other municipalities in the Study Area were all incorporated either before 1901 (Shuniah, Neebing, Fort William, Port Arthur, Oliver) or in the first decade or so after 1901. The latter group has not been omitted from the Study Area in this table because the distortion resulting from the small population involved at the time of incorporation is not regarded as serious.

Source: Assessed population records.

\* Although the elementary age group is often considered to be 5-13, age distributions by grade in Ontario show that over half the grade 8 enrolment is 14 years of age or older.

\*\* Not calculated where the increase in school age component was accompanied by a decrease in total population, or where the school age component decreased.

N.A. - Records not available for this period.

Source: 1965 population from Municipal Assessment Reports.

\* Exclusive of the effect of deaths and of migration to, from or within the Study Area.

\*\* Although the elementary age group is often considered to be 5-13, age distributions by grade for Ontario show that over half the grade 8 enrolment is 14 years of age or older.

## PART II

### The Functions of Local Government in the Study Area

The eight sections in this part of the report each cover one or more of the functions or services performed by local government. The categories which comprise these sections were largely predetermined by the breakdown required by the Province for the reporting of municipal finance statistics; for it was deemed essential to compile a comparative picture of each municipality's expenditure and debt by function.

The financial information is given throughout for the years 1959 and 1964. Comparable data are now being assembled for 1954. The 1965 picture will be compiled as soon as all the municipal Audit Reports for that year are in the hands of the Department of Municipal Affairs.

The omission of a section on the vital function of planning is partly due to the fact that it is not a separate category in the financial reports, and partly because it is impossible at this stage of the Review to determine and report objectively on its effectiveness throughout the Study Area.

A general word of explanation should be given concerning the "recoveries" shown in the expenditure and debt tables for the various functions. These have been defined to include both recoveries from revenue-producing operations, and recoveries from another municipality.

Specific comments on each of the sections in Part II follow.

Education, Section 3, is covered more fully than the other services because of its vital role both in the community and in municipal finance. Tables 16 to 22 contain a comprehensive picture of the boards, schools, classrooms, enrolment and teachers in the Study Area and adjacent unorganized territory.

Unfortunately the data on educational finance available at time of publication are limited to the "net" expenditures, that is the portion borne by the municipal corporations out of school taxes. These figures are given in

Table 53 for the years 1959 and 1964. Comparable data on the gross expenditures of boards of education and school boards are being compiled from the boards' annual Audit Reports. As the difference between the gross and net figures is due largely to Provincial education grants which vary according to complex grant formulae, the gross/net relationship can vary considerably among municipalities. The gross figures, when available, will of course provide a much closer indication of the relative standard of education being provided in the various municipalities of the Study Area.

Tables will be found in each of the remaining Sections of Part II setting forth by function the gross and net expenditures and debt of each municipality for the years 1959 and 1964.

General Government Administration, Section 4, although not as significant in terms of municipal expenditures as some of the other functions, comprises the vital control and co-ordination activities of local government. These include the legislative and executive functions along with several important divisions of municipal administration, including the departments of the clerk, treasurer and assessor.

Public Works, Sanitation, Waste Removal, Local Improvements, and Utilities comprise Section 5. Treatment of all these important functions in the one section results from the categories used for municipal finance reporting. Thus one important aspect of transportation, expenditures on roads, cannot be fully segregated from other public works, although constituting the major expenditure under that head. Further, public works expenditures and recoveries could not be separated fully from sanitation and waste removal. Transit, the other important component of the total transportation system, is grouped with the other public utilities which include water, hydro and telephone.

It should also be noted that the debt charges for public utilities and their recovery from the utilities are included under "Sundry Expenditures" which are given in Tables 47 and 48.

The following four Sections of Part II, Protection to Persons and Property, Public Welfare, Health and Hospitals and Parks, Recreation and Community Services are relatively clear-cut and self-explanatory.

The final Section on Sundry Functions includes those activities not allocated to one of the other Sections. Among these, the related fields of housing and urban renewal are perhaps of greatest significance. While the Lakehead Renewal Study did not reveal problems of great magnitude in these fields, public housing activity by both Fort William and Port Arthur, and further renewal studies currently under way or contemplated are evidence of local concern. Table 46 in this Section provides background information on characteristics of the housing stock as recorded in the 1961 Census.

Tables 47 and 48 have already been referred to, and as indicated in their footnotes they contain various sundry expenditures not allocable to the other Sections of Part II, along with the utilities debt charges and their recovery. In comparing these tables with their companion Table 49 showing sundry debt, the fact that the latter does not contain utilities debt should be borne in mind.

SECTION 3 - EDUCATION

List of Tables

| <u>Title</u>  | <u>Table No.</u> |
|---|------------------|
| Administration of Education in the Study Area and Adjacent Unorganized Territory, 1959 and 1965                         | 16               |
| Schools, Classrooms, Pupils and Teachers in the Study Area, 1959 and 1965   | 17               |
| Public and Separate Elementary Enrolment by Grades in the Study Area and Adjacent Unorganized Territory, September 1965 | 18               |
| Secondary School Enrolment by Grades in the Urban Municipalities of the Study Area, September 1959 and 1964             | 19               |
| Non-Resident Students Enrolled in Fort William and Port Arthur Secondary Schools, September 1965                        | 20               |
| Number of Teachers and Average Annual Salary Paid in the Study Area and Adjacent Unorganized Territory, 1959 and 1964   | 21               |
| School Capacity and Enrolment in the Study Area and Adjacent Unorganized Territory, September 1965                      | 22               |

Source: Annual Municipal Audit Reports. Distribution of some totals by function has required estimation due to occasional lack of information in the Reports.

\* Includes roads, bridges, curbs, gutters, sidewalks and snow removal.

\*\* Includes sanitary sewers and sewage disposal, storm sewers, garbage collection and disposal, street cleaning.

\* Includes winter works grants from both the Federal and Provincial governments, as well as other Provincial grants. In some cases the separation of Federal winter works grants from grants in lieu of taxes had to be estimated.

\* Includes debt charges re local improvements, O. W. R. C. and C. M. H. C.

| Study Area                | 1959        | 119,000             |
|                           | 1964        | 157,634             |

Source: Annual Municipal Audit Reports. Distribution of some totals by function has required estimation due to occasional lack of information in the Reports.

\* Includes police, fire, street lighting, law enforcement, protective inspection.

\*\* All debt was reported as "own issue".

\*\*\* For fire protection facilities. Although the 1964 figure is reported as recoverable from the fire areas of Kakabeka and Murillo, it is not reported as assumed debt in any of the other Audits. It is not shown as recoverable in this table because it is evidently a liability of the Study Area.

SECTION 7 - PUBLIC WELFARE

List of Tables

| <u>Title</u>   | <u>Table No.</u> |
|--|------------------|
| Municipal Expenditures from Current Revenue for Public Welfare in the Designated Municipalities of the Study Area, 1959 and 1964           | 35               |
| Municipal Expenditures from Current Revenue for Public Welfare in the Designated and Outer Municipalities of the Study Area, 1959 and 1964 | 36               |
| Debenture Debt Outstanding for Public Welfare Facilities in the Designated Municipalities of the Study Area, 1959 and 1964                 | 37               |
| Debenture Debt Outstanding for Public Welfare Facilities in the Designated and Outer Municipalities of the Study Area, 1959 and 1964       | 38               |

TABLE 35

Source: Annual Municipal Audit Reports. Distribution of some totals by function has required estimation to occasional lack of information in the Reports.

\* All debt shown is "own issue"; no assumed or recoverable debt reported.

## PART III

### Municipal Finance in the Study Area

The Sections in this part of the report deal with the overall municipal financial picture throughout the Study Area, in terms of assessment, expenditures and debt. Revenue studies are still in process.

Assessment, Section 11, deals with the assessments made in 1958 and 1963 for taxation in 1959 and 1964, so as to be comparable to the expenditures and debt tables. The assessments have all been equalized by applying the equalization factors determined for each year by the Assessment Branch of the Department of Municipal Affairs; since assessment practices vary among the municipalities, this step was necessary to put all the figures on as comparable a basis as possible. The limitations of assessment equalizations should be recognized by those who use the equalized figures.

Tables 50 and 51 present the assessment data. A breakdown of taxable assessment is given, and assessment exempt from taxation is then added to complete the picture. The figures on non-taxable assessment must, as the table footnotes indicate, be used with particular caution.

Current Expenditures, Section 12, combines the expenditures by function given in Part II of the report, into summaries of gross and of net expenditure by function, which are shown in Tables 52 and 53. As previously noted, gross education expenditures are not yet available, so that education only appears in Table 53.

Gross and Net Debt, Section 13, provides the comparable summary of debt by function, which is given in Table 54.

Per Capita Expenditures, Section 14, expresses the gross and net current expenditures (from Tables 52 and 53) in per capita terms, i. e. divided by the population of each municipality in each of the years 1959 and 1964. The per capita figures are given in Tables 55 and 56.

Expenditures per \$1,000 of equalized assessment are also being calculated along with comparable ratios of debt to population and assessment, but this work is still in process.

Part III of the report thus gives reasonably comprehensive coverage but only for a past period. To complete the financial analysis necessary for the Review will require a hard look at the probable future financial resources and needs of the municipalities. It is anticipated that the written submissions and public hearings will produce significant evidence and opinion on this subject which will also continue to claim the attention of the Review staff.

SECTION 11 - ASSESSMENT

List of Tables

| <u>Title</u>   | <u>Table No.</u> |

Source: Municipal assessment reports; equalization factors determined by the Assessment Branch, Department of Municipal Affairs.

\* Includes business assessment.

\*\* The equalized exempt figures have been obtained by applying the overall equalization factor for each municipality to the unequalized assessment for exempt property. This is the only feasible way of obtaining exempt figures roughly comparable to equalized taxable assessment, but it is not a highly reliable method. The exempt figures should therefore be regarded as estimates only, and used with caution.

Source: Municipal assessment reports; equalization factors determined by the Assessment Branch, Department of Municipal Affairs.

\* Includes business assessment.

\*\* The equalized exempt figures have been obtained by applying the overall equalization factor for each municipality to the unequalized assessment for exempt property. This is the only feasible way of obtaining exempt figures roughly comparable to equalized taxable assessment, but it is not a highly reliable method. The exempt figures should therefore be regarded as estimates only, and used with caution.

neg. - negligible

SECTION 12 - CURRENT EXPENDITURES

Source: Annual Municipal Audit Reports. Distribution of some totals by function has required estimation due to occasional lack of information in the Reports.

(1) The cost of education to the municipal corporation is shown; this is the amount the municipality paid to or on behalf of school boards, and includes school debt charges.

(2) Includes roads, bridges, curbs, gutters, sidewalks, snow removal, sanitary sewers, sewage disposal, storm sewers, garbage collection and disposal, street cleaning.

(3) Includes police, fire, law enforcement, street lighting, protective inspection and other miscellaneous expenditures.

(4) Including hospitals.

(5) Includes arenas, stadiums, libraries and community centres. The figures show the extent of the municipalities' net support of these services, after deduction of grants and of any municipal revenues received from admissions or other charges made for the services.

(6) Includes discount for taxes, taxes written off, interest on short-term borrowing, provision for reserves, and deficit on utilities. Utilities debt charges, which are recoverable from the utilities, have been netted out.

SECTION 13 - DEBT

Title

Table No.

Summary by Function of Gross and Net Debenture Debt Outstanding  
in the Designated and Outer Municipalities of the Study Area, 1959  
and 1964

Source: Annual Municipal Audit Reports. Distribution of some totals by function has required estimation due to occasional lack of information in the Reports.

(1) Includes roads, bridges, curbs, gutters, sidewalks, snow removal, sanitary sewers, sewage disposal, storm sewers, garbage collection and disposal, street cleaning.

(2) Hospitals accounted for all debt reported in this category.

(3) Since all recoverable debt reported in this category has been assumed by other municipalities within the study area, the net debt after any recoveries is shown.

(4) Includes arenas, stadiums, libraries and community centres.

(5) Includes police, fire, street lighting, law enforcement, protective inspection.

\* For fire protection facilities. Although the 1964 figure is reported as recoverable from the fire areas of Kakabeka and Murillo, it is not shown as assumed in any of the other Audits, and is treated here as a liability of the study area.

Source: Annual Municipal Audit Reports. Distribution of some totals by function has required estimation due to occasional lack of information in the Reports.

(1) The per capita cost of education to the municipal corporation is shown; this is the amount the municipality paid to or on behalf of school boards, and includes school debt charges.

(2) Includes roads, bridges, curbs, gutters, sidewalks, snow removal, sanitary sewers, sewage disposal, storm sewers, garbage collection and disposal, street cleaning.

(3) Includes police, fire, law enforcement, street lighting, protective inspection and other miscellaneous expenditures.

(4) Including hospitals.

(5) Includes arenas, stadiums, libraries and community centres. The figures show the extent of the municipalities' net support of these services, after deduction of grants and of any municipal revenues received from admissions or other charges made for the services.

(6) Includes discount for taxes, taxes written off, interest on short-term borrowing, provision for reserves, and deficit on utilities. Utilities debt charges, which are recoverable from the utilities, have been netted out.

## APPENDIX

### Procedure for Making a Submission to the Review

The following procedure should be followed by those intending to file written briefs:

- (1) The Research Director must be informed by May 20th of your intention to present a brief. This can be done by submitting your name, mailing address and phone number to the Review office, 22 North Cumberland Street, Port Arthur, telephone 344-9167.
- (2) Six copies of your brief will be required, to be received by the Review office not later than June 6, 1966.
- (3) The Review staff cannot undertake to reproduce any briefs for further distribution. Any requests from the press or others for additional copies will therefore be referred to the authors.
- (4) If you submit a brief, it will be assumed that you will be prepared to discuss your submission at the Public Hearings to be held commencing June 13, unless you specifically request exclusion from the hearings.

Individuals (but not local authorities or organizations) may give oral testimony at the hearings without submitting a written brief beforehand. If you intend to do so, you should follow step (1) of the above procedure before May 20th and specify "Hearing Only".
